### Bachelor of Arts Degree

This degree program is intended for students whose interests outside mathematics are oriented toward the arts, humanities and social sciences. The requirements in these areas are greater than for the B.S. Degree. Students in this degree program are strongly encouraged to select an area where mathematics is applied. These courses can be used as Supporting Courses. Areas similar to those in the B.S. Degree can be used. The only courses in this degree which can be scheduled under the satisfactory/unsatisfactory option are Supporting Courses.
